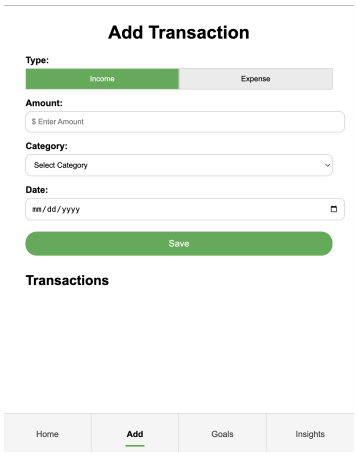
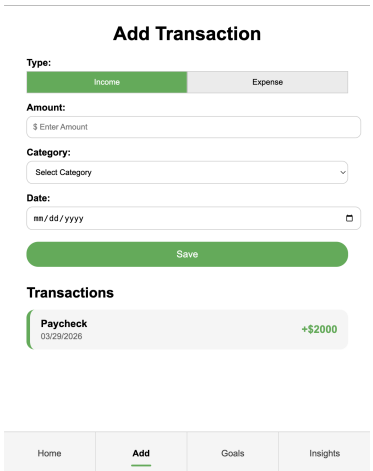
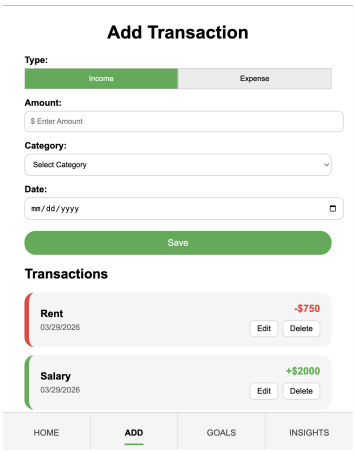
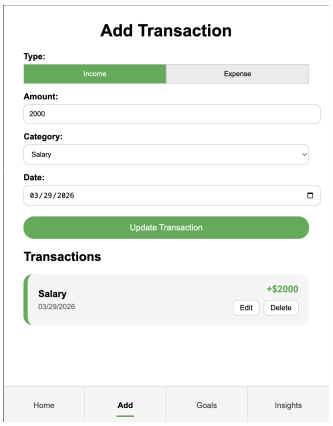
Christopher Ocloo: Transaction Screen









Task List

- Switch between Transaction Type: Shallow/Horizontal
  - A toggle between income and expense that affects how transactions appear in the transaction menu
- Field Inputs: Shallow/Horizontal
  - Amount field is entry-based, Category has a dropdown with default categories or there is an ‘other’ option which adds a field for personalized categories, Date field can either take a user-entered date or selection from calendar.
- Category ‘Other’ Option: Moderate
  - A user wants to add a category that doesn’t exist; they can click ‘other’ and populate a customized category.
- Add a transaction: Moderate
  - User must conduct multiple steps to add a transaction: Select type (Income/Expense), Enter amount, Choose category, Select date, Click save
- Managing Current Transactions in the menu: Deep
  - If the user has added a transaction that they would like to edit or delete, it is accompanied by an edit and delete button.
  - This comes after the user had added a transaction, so this relies on the fact that one exists, which takes a multitude of steps and verification that a transaction exists
